Assessment of Climate Change Factors Affecting Wood Growth and Timber Quality

Message from the Guest Editors

While the changing climate's impacts on some ecological processes are well-established, the consequences on wood formation and timber quality are not as clear. Then how might wood biology help to disentangle the effect of global change on future wood quality? How might wood technologists use biological inputs to manage future innovative and sustainable wood chains? This Special Issue will offer a platform for stimulate the development of new approaches to address climate-related challenges through the perspective of wood biology and technology nexus. We encourage contributions analyzing the growth trends of forests in general and trees in particular, including cultivated stands. Particular attention will be paid to wood production and the possible changes in wood material quality, underlining that wood may represent a possible instrument in tackling climate change itself, e.g., in the building sector. Changes in wood density, mechanical properties or chemical composition could have a considerable impact in the wood products. Studies deepening the knowledge on the effectiveness of forest trees as carbon sinks in relation to growth conditions will also be welcomed.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
