

## Special Issue

# Application of Plant Biotechnology in Forestry

### Message from the Guest Editors

Forest trees constitute the majority of continental biomass and terrestrial biodiversity. They provide various ecological services and are a source of raw material for many essential purposes. In recent years, the need for wood and its derivatives has increased, and will continue to do so. Biotechnological tools such as genomic selection, micropropagation and genetic engineering will play an essential role in meeting this demand with the smallest possible environmental impact. The objective of this Special Issue is to deepen our knowledge of the latest biotechnological approaches to forestry, such as rejuvenation through clonal propagation, including cuttings, micrografting and tissue culture; haploid generation; somatic embryogenesis; protoplast fusion; cryopreservation of germplasm; genetic engineering; and functional mapping of quantitative trait loci.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

---

### Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,  
I-25121 Brescia, Italy

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
