Altitude Distribution of Insects in Tropical and Subtropical Rainforests

Message from the Guest Editors

Altitudinal gradients present rapid changes in environmental conditions and corresponding patterns of organisms within short geographic distances. Studying the altitudinal distributions of insects—a significant aspect of terrestrial biodiversity—has helped us understand the dynamics of biodiversity and ecosystem processes and the potential impacts of climate change, aiding in the development of effective conservation strategies. Although insects in the lower latitudes are considered more sensitive to altitudinal differences, relatively little is known about the mechanisms associated with organisms' response patterns from the viewpoint of their phylogenetic positions and ecological traits in tropical and subtropical rainforests. In this Special Issue, we aim to improve our understanding of the altitudinal distribution of insects in tropical and subtropical rainforests, which is highly necessary in order to halt and manage the decline of insect biodiversity in a changing world.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
