

## Special Issue

# Circular Bioeconomy in Forest-Based Sector: Governance and Policy

### Message from the Guest Editors

The circular bioeconomy is a sustainable alternative to the linear economy paradigm, and aims to mitigate the environmental impacts of natural resources use and to create a zero-emission society. On the one hand, “bioeconomy” emphasizes the importance of technological innovations aimed at complementing or substituting non-renewable resources with bio-based alternatives. On the other hand, “circular economy” focuses on the technological and organizational innovations aimed at accounting for and reducing resource use and consumption, improving resource use efficiency and recycling, and minimizing the emissions of waste and greenhouses gases.

In the circular bioeconomy context, the forest-based sector plays a key role in terms of added value, economic growth, and green job creation through the supply of renewable raw material for construction, furniture, and bioenergy.

The aim of this Special Issue is to promote the debate and the sharing of knowledge and experiences on governance, policies, and innovations concerning the forest-based circular bioeconomy. We encourage studies from all scientific fields, including case studies, to contribute to this issue.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
