# Forest Biomass, Carbon Neutrality, and Climate Change Mitigation

## Message from the Guest Editor

This Special Issue plans to highlight the latest approaches to determining the climate implications of forest management. It is aimed at providing contributions that represent varied forest management strategies and the implications on carbon balances across various parts of the world. Potential topics include, but are not limited to:

- Greenhouse balance of forest management;
- Optimal management of forests for climate mitigation outcomes
- Options for sustainable use of forestry residues
- Novel forest biomass derived bioproduct development
- Implications of the use of forest biomass for bioenergy generation

## **About the Journal**

### Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
