Tree and Shrub Bark: Management, Sustainable Production, and Opportunities in the Forest Bioeconomy

Message from the Guest Editors

Tree and shrub bark is a diverse and valuable resource with growing importance in the forest-based bioeconomy; This topic invites original research and reviews focused on the management, sustainable production, transformation, and innovation of bark from a wide range of forest species. Well-known examples include cork from *Quercus suber*, valued for insulation, packaging, and design; cinnamon bark (*Cinnamomum* spp.), used in food and cosmetics; willow bark (*Salix* spp.), rich in salicylates; and barks rich in tannins, such as Acacia or Quillaja, used in industrial processes. Other notable examples are Quassia bark (*Quassia amara*), known for its bitter compounds with insecticidal and medicinal applications, and Lapacho bark (*Handroanthus* spp.), traditionally used in herbal remedies. We welcome contributions on bark harvesting and forest management, processing technologies and value chains, industrial applications and innovation, socioeconomic and ecological dimensions, and bark's integration into circular and regional bioeconomies. This Special Issue aims to highlight bark as a strategic non-wood forest product, fostering its sustainable use and innovation across various sectors.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
