

## Special Issue

# Natural Climate Solutions, Carbon Storage and Forest Management in Boreal Forests

### Message from the Guest Editors

This Special Issue will provide an overview of the most recent advances in the field of NCSs suitable for implementation in boreal forests in various countries.

Potential topics include, but are not limited to:

- Protection of intact and other high-conservation-value boreal forests (boreal REDD+) as a climate project;
- Reducing the emissions from forest fires as a climate project;
- Interaction between forest certification and climate certification projects;
- Improved forest management and climate smart forestry on the basis of NCSs;
- Forestry climate projects in managed/non-managed forest lands, agricultural lands, and other type of lands;
- Approaches to calculating the climate change mitigation potential of forests.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
