

## Special Issue

# Carbon, Nitrogen and Phosphorus Cycling in Forest Soils

### Message from the Guest Editor

The majority of carbon stored in the soils of the world is stored in forests. The refractory nature of some portions of forest soil organic matter also provides the slow, gradual release of organic nitrogen and phosphorus to sustain long term forest productivity. Contemporary and future disturbances, such as climatic warming, deforestation, short rotation silviculture, the invasion of exotic species, and fire, all place strains on the integrity of this homeostatic system of C, N, and P cycling. On the other hand, the CO<sub>2</sub> fertilization effect may partially offset losses of soil organic matter, but many have questioned the ability of N and P stocks to sustain the CO<sub>2</sub> fertilization effect. We invite submissions for a Special Issue of *Forests* on the subject of “Carbon, Nitrogen and Phosphorus Cycling in Forest Soils”. Topics for submissions may include:

- forest soil C stocks and climate change,
- methane production and oxidation in forest soils,
- soil C,N, and P during forest succession,
- or new methods for study of C, N, and P cycling.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
