

Special Issue

Carbon and Nitrogen in Forest Ecosystems—Series I

Message from the Guest Editor

Understanding differences in carbon and nitrogen distributions and cycling spatially and temporally using various approaches is essential in forest ecosystems. In addition, influences of biotic and abiotic factors and natural and artificial disturbances on carbon and nitrogen cycling need to be understood to draw implication to forest management practices. This Special Issue encourages studies on:

- different approaches to measure carbon and nitrogen distribution and cycling: field measurement, remote sensing and modeling
- carbon and nitrogen cycling within an ecosystem and among ecosystems
- carbon and nitrogen cycling along successional gradients
- roles of microbes, insects and animals in carbon and nitrogen cycling
- influences of climate change on carbon and nitrogen cycling
- artificial manipulation of trees to simulate carbon and nitrogen cycling to climate change
- influences of forest management practices on carbon and nitrogen cycling
- ecosystem based forest management

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
