

Special Issue

Culture, Plant Health, and Genetics of Christmas Trees in Changing Climate

Message from the Guest Editors

Christmas trees are an important tree crop in much of North America and Europe. Production of high-quality trees requires careful management of cultural inputs such as irrigation, fertilization, and pest management, as well as selection of superior genotypes. In addition, the ecological and environmental aspects of Christmas tree production are receiving heightened attention due to the increased impacts of extreme weather events and other climate-related phenomena. Moreover, the post-harvest quality of trees and marketing are critical areas for research and outreach activities. In this Special Issue, we seek contributions on leading research on all areas of Christmas tree culture, genetics, physiology, management, ecology, and marketing. We anticipate most submission will be based on papers presented at the 15th International Christmas Tree Research and Extension Conference, but we welcome other submissions as well.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
