Economic Contribution of Forest Industry: Urban Forests, Forest Products Industries and Ecosystem Services

Message from the Guest Editors

Urban forestry, the traditional forest products industry, and ecosystem services each constitute important components of local and regional economies. Understanding the economic contributions and importance of urban forestry, forest products industries, and ecosystem services has become essential for policymakers, public and private agencies, and academics as these industries have intimate connections to jobs, income, and taxes. Tracking the economic contribution of the forestry sectors and ecosystem services is critical for several reasons. First, quantifying the magnitude of these contributions is essential to garnering support for urban forestry, forest products industry, and ecosystem services. Second, documenting changes in these activities over time is a useful method for measuring the economic health of these activities. Third, the economic contribution data can be used to assess if changes in policy, legislation, or tax law affect urban forestry and forest-based economic activity. Finally, documenting the shifts in urban forestry and forest-based economic activity may indicate how responsive these activities are to changes in local supply and demand.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
