The Adaptation of Forest Trees Under Climate Change

Message from the Guest Editor

The adaptation of forests to ongoing climate change is essential to ensure the long-term vitality of these ecosystems. There are gaps in our knowledge on the adaptation of forests to meteorological extremes (which are predicted to become more common in future), as well as their adaptation to various direct and indirect interacting effects of climate change. Measures to enhance adaptation and the perception of such measures among forest managers and society at large need to be enacted to ensure the vitality of this ecosystem in future. Potential topics include, but are not limited to, the following:

Direct and carry-over effects of weather extremes on growth, vitality, and wood traits;

Adaptive forest management from plot to landscape scales;

Genetic determination of traits essential to adaptation (from clone to provenance level);

Effect of single and multi-layer tree species mixtures on traits essential to adaptation;

Enhancement of forest resistance against and/or resilience to effects of climate change;

Measures to enhance adaptation as part of biodiversity maintenance strategies;

Social perception of forest adaptation, maladaptation, and measures to enhance.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
