Special Issue

Management of the Sustainable Forest Operations and Silviculture

Message from the Guest Editors

The concept of naturally growing forests has been gaining attention of late; however, it is crucial to manage forests to ensure their multipurpose functions. The primary aim of silviculture is to guide forest growth. It is essential to implement those same silvicultural concepts through forest operations. Traditionally, silviculture has been understood as directing operational choice; however, every choice has its potential and limitations, which will impact silviculture and may require adaptation. The absence of modern equipment might impede management, while the availability of suitable machinery can open new perspectives for silviculture. Therefore, forest operation planning should also include silvicultural assessment and lead to mutual adaptations for the highest overall benefit. This SI aims to explore the convergence between silviculture and forest operations. It seeks to identify common areas with significant potential for generating synergies and to develop new ideas on how to enhance that integration. Contributions may be based on field studies, remote sensing, or modeling, encompassing traditional methodological approaches as well as the integration of AI tools.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
