

## Special Issue

# Impact of Mycorrhiza on the Distribution, Dynamics and Functioning of Forests

### Message from the Guest Editors

The size of forests around the world is decreasing. Meanwhile, mycorrhizal fungi play an important role in the restoration and function of forests. The mycorrhizal network connects trees of different species, ages and sizes to create a specific forest environment that provides the necessary water and nutrients for growth in response to environmental changes. This extensive network of trees and mycorrhizal fungi also facilitates the regeneration of younger trees in the understory, helping them tolerate stressful environmental conditions resulting, e.g., from abiotic and biotic factors. Moreover, mycorrhiza is of fundamental to the organization of new forests because they create favorable local conditions for the establishment and growth of tree seedlings. The aim of this Special Issue is to present selected articles regarding the impact of mycorrhiza on the distribution, dynamics and functioning of forests, which are a key symbiotic partner of trees; our understanding of this relationship must be enhanced in the face of future challenges related to forest protection, the mitigation of forest extinction and decline.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
