

## Special Issue

# Species Invasion and Diversity Conservation in Mangroves

### Message from the Guest Editor

High primary productivity and habitat heterogeneity, as characteristics of mangroves, are the main reasons supporting the rich biodiversity of mangrove ecosystems. *Spartina alterniflora* invasion has caused the decrease in local biodiversity and degradation of the mangrove ecosystem. At present, a number of studies on mangrove biological invasions have been carried out; however, no consistent conclusion had been reached. Thus, more targeted research is necessary to scientifically evaluate the effects of invasions on the structure and function of the mangrove ecosystem. The purpose of this Special Issue is to deepen the research on mangrove biological invasions, deepen the exploration and evaluation of the status of invasions and invasion effects, accelerate the research and application of invasion mechanisms and control methods, and evaluate the impact on ecosystem services.

- Invasive effects on mangrove biodiversity;
- Invasive species control methods;
- Effects of biological invasion of mangroves;
- Risk assessment and prediction of future invasions;
- Restoration methods and effects of mangrove;
- Invasive species management and future research.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
