

## Special Issue

# Wildlife Hunting and Conservation in Forests

### Message from the Guest Editor

Animals in forests face a lot of challenges due to climate change and forest environment changes, as well as pressure from humans, which grows bigger year by year. Indeed, while some species which were endangered in the past are now seeing an increase in their numbers, others, which were stable not that long ago, are now facing a severe population decline. This, among other factors, means that previous management rules are no longer valid. The new IAS EU policy is a challenge for European countries. Society around the world is changing in terms of how they view the use, management, and conservation of animals, with attitudes shifting toward different directions. How can we build new approaches to game management and conservation policies? How can we shape public attitudes toward game management and conservation? How can we engage the general public in conservation actions?

Potential topics of interest in this Special Issue include but are not limited to:

- Changes in the biology and ecology of game animals according to climate change;
- IAS (invasive alien species) eradication—problems and opportunities;
- What shapes attitudes toward hunting and conservation actions.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
