Special Issue

Biorenewable Forest-Based Materials

Message from the Guest Editor

Bio-based materials obtained from renewable resources are becoming sustainable alternatives to fossil-based materials due to their ready availability, abundance, and flexibility as feedstock and low-energy consumers within a "zero-waste" strategy perspective. They promote the development of economic benefits in forgotten rural areas, creating more employment, increasing the added-value product chain from the biomass producer's perspective, encouraging innovation, and developing competitive ecofriendly processes and industries. The combination between the life cycle of the forest biorefinery, along with a growing human awareness of its positive environmental impacts, may lead overall to a more conscientious use of forest-based biomaterials.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
