

Special Issue

Forest-Atmosphere Interactions

Message from the Guest Editors

Forest ecosystems strongly interact with the atmosphere. These coupled processes alter atmospheric chemistry and physics and make the forest subject to changes in environmental factors. Despite their importance to global and local climate and air quality, to date, not all processes of forest-atmosphere interactions have been described or elucidated. This special issue will focus on solving this gap. As global temperatures increase and exacerbate climate change, it is important to understand how forested areas will react to such changes, since the feedback to the atmosphere can be very large: from a direct impact on the global radiation budget via aerosol and greenhouse gas production and a change in the atmospheric lifetime of pollutants to alterations in local precipitation. For this special issue we welcome investigations in order to constrain the processes governing the forest-atmosphere interactions on various scales. Only based on a solid database and a fundamental understanding can guidelines for mitigation and adaptation strategies be suggested to policy-makers.

Guest Editors

Dr. Ana María Yáñez Serrano

1. CREAM (Center of Ecological Research and Forestry Applications), Barcelona, Spain
2. IDAEA Institute for Environmental Assessment and Water Analysis, Barcelona, Spain

Prof. Dr. Anke Nölscher

Atmospheric Chemistry Group, University of Bayreuth, Bayreuth, Germany

Dr. Eliane Gomes-Alves

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
