

## Special Issue

# Past Environmental Changes and Forest Conservation

### Message from the Guest Editors

Forest managers, biological conservationists, and policymakers need scientific-based solutions to mitigate the threat of species in the current context. The need to develop multidisciplinary and multiscale approaches with an integration of both present-day observations and a historical perspective must also be stressed. Modern population genetics can evaluate species diversity and potential adaptation.

Palaeoecological time series may inform us about past species occurrences and range changes, their migration rates and routes, and their potential resilience to past climate changes and disturbance regimes.

Vegetation models allow us to predict potentially suitable habitats for threatened individual species and populations. This Special Issue will demonstrate how palaeoecology, modern genetics, and modeling may act together to evaluate the environmental threats on forests and how they may contribute to the long-term conservation strategies. **Keywords:**

- forest conservation and ecology
- palaeoecology
- phylogeography
- vegetation modeling
- biogeography
- trees genetics
- disturbance regimes
- resilience

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
