Analysis of Forest Landscape and Land-Use Based on Remote Sensing Technology

Message from the Guest Editor

The aim of this work is to develop new remote sensing analysis methodologies that allow for highlighting the cause and effect relationships between different forms of natural and anthropic disturbances or environmental changes, and the ecological functions fundamental for the production of ecosystem services like carbon sequestration, water cycling and regulation, soil fertility, and biomass productions. Research can be transdisciplinary and involve different disciplines, such as ecology, physiology, botany, remote sensing, forestry, and others capable of contributing to linking and quantifying the causes and effects of stress or disturbances actions on the production of ecosystem services.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
