# Biology, Diagnosis and Management of Forest Phytoplasmas

### Message from the Guest Editor

Forest plant ecosystems are economically important for timber industry, food industry (wild berries), pharmacy (medicine plants) etc. Plant-pathogenic phytoplasmas can cause serious plant diseases, affecting natural ecosystems and plant biodiversity. Phytoplasmas can be spread from wild forest plants to agricultural plants and vice versa by phloem-feeding insect vectors, mainly leafhoppers, planthoppers, and psyllids. Furthermore, global warming introduces insects and diseases to new geographic locations.

Potential topics include, but are not limited to:

- Forest pathology—phytoplasma-caused diseases of forest plants, including trees, shrubs, wild pome, stone, small fruit, nuts, and medicinal plants, and other wild forest herbal plants;
- Urban forests and phytoplasmas;
- Forest entomology—phytoplasma insect vectors;
- Phytoplasma diseases and forest ecology, management, and restoration;
- Phytoplasma diseases and climate change impacts, adaptation and mitigation in forests.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
