

Special Issue

Simulation Models of the Dynamics of Forest Ecosystems

Message from the Guest Editors

Simulation models of the dynamics of forest ecosystems are essential decision tools to maintain the long-term sustainability and biodiversity of forest ecosystems and evaluate the extent to which forest management activities may affect forest successional pathways. The improved understanding of the functioning of forest ecosystems and increased societal demands for more predictive capabilities of models created a background for a new stage in which ensembles of models are used for the prediction of the complex dynamics arising among forest ecosystem components. This includes the assessment of synergies and trade-offs among ecosystem services. Forest dynamics models contribute to reassuring the public on the long-term integrity of forest ecosystems and their services.

This Special Issue will include papers on modeling forest dynamics. Research articles may focus on topics related to the development and application of simulation algorithms, data requirements, calibration, and evaluation, as well as future directions in model development. Models working at different scales, from tree to site to landscapes are also welcome.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
