

Special Issue

Forest Biodiversity Conservation with Remote Sensing Techniques

Message from the Guest Editors

This Special Issue of *Forests* is focused on the assessment of forest biodiversity and conservation utilising remote sensing and Earth Observation technologies. Research articles may focus on any aspect of forest biodiversity and conservation using remote sensing approaches, including the prediction and monitoring of forest species, their environment and habitat, as well as conservation initiatives that utilise remote sensing technologies from local to global scales. We welcome contributions using a range of remote sensing platforms from hand-held mobile devices, unmanned aerial vehicles (UAVs) and aircraft, as well as satellite-based approaches

Guest Editors

Prof. Dr. Nicholas Coops

Integrated Remote Sensing Studio, Department of Forest Resources Management, University of British Columbia, 2424 Main Mall, Vancouver, BC V6T 1Z4, Canada

Prof. Dr. Scott Nielsen

Department of Renewable Resources, General Services Building, University of Alberta, Edmonton, AB T6G 2H1, Canada

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
