

Special Issue

Analyses and Design of Fruit-Tree Based Agroforestry Systems

Message from the Guest Editors

Dear colleagues,
Agroforestry is the simultaneous cultivation of trees and other crops/livestock on the same land. Fruit trees are high-value crops that represent the most used trees in agroforestry systems worldwide.

With this Special Issue, we aim to gather details of current research that analyzes or could aid in the design of fruit tree-based agroforestry systems (including olive orchards and vineyards), covering all aspects from analyses of current modern or remnant traditional systems to developments involving useful fundamental or applied knowledge and from modeling to field experimentation. Although contributions from temperate climates are encouraged, results from other climates are also welcome if they bring new knowledge applicable to the analyses and design of fruit tree-based agroforestry systems in temperate climates. Please note that this Special Issue is organized in cooperation with the 6th European Agroforestry Conference ("EURAF2022") and welcomes submissions from participants in this conference. Further information on EURAF2022 are available at this link:

<https://uninuoro.it/euraf2022/>.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
