

## Special Issue

# Wood Quality and Mechanical Properties

### Message from the Guest Editor

Wood is a material from a renewable source and with excellent mechanical properties. In civil construction, this material stands out because it has an excellent relationship between mechanical strength and density compared to other construction materials, such as concrete and steel. Anatomical issues (which vary from species to species) and soil and climate characteristics directly impact its properties. The crescent interest in building high and robust wooden buildings has stimulated investigations about wood's physical and mechanical properties and their relationships with other relevant material parameters. In this Special Issue of *Forests*, "Wood Quality and Mechanical Properties", works are expected to focus on the analysis of wood quality (of great importance in the case of planted forest species), as well as the characterization (determination of physical and mechanical properties) of wood species with little or extensive use and even engineered wood materials, whose quality and characterization is highly important to spread their use.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
