Chemical Study of Forest Bark and Potential Uses

Message from the Guest Editors

Wood bark is a very important, valuable and abundant renewable resource that can be converted into several types of high-value-added products, including chemicals, biofuels and advanced materials. Most of the bark is used for energy or is not used at all and is left in the forest as a worthless material. Wood bark research has been developing rapidly in recent years. In order to obtain this added value from the bark in the production of fuels and various valuable chemical compounds, it is necessary to find the best effective approaches to research wood bark, especially as unused plant biomass and to obtain products with versatile properties for their application in various fields. Investigation of wood bark as a raw material in different ways, including extraction to obtain extractives, makes it possible to maximize the added value of the total raw material. This Special Issue aims is to increase knowledge about the chemical study of forest bark and its potential uses with an emphasis to gain versatile knowledge about wood bark the accumulated knowledge will allow us to use it further to potentially evaluate it as a starting material for the production of various products.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
