

## Special Issue

# Engineered Wood Products: From the Latest Perspective

### Message from the Guest Editor

Engineered wood products (EWP) are wood-based materials used mainly for structural purposes. EWPs include products developed in early 20th century, such as plywood and glued laminated timber, and also products developed later, such as oriented strandboard, laminated veneer lumber, wood I-beams, laminated/oriented strand lumber and cross-laminated timber. Since huge and complex wood structures have emerged around the world, even in countries where wood is not the main construction material, more people have become interested in this research field. Thus, new challenges to fully developing this industry appear day after day, and we must overcome them. In this context, we welcome scientific contributions on the following topics, but are not limited to:

- Material properties and structural behavior
- Durability, permanence and performance
- Theoretical vs. experimental behavior
- New approaches to manufacturing
- Non-destructive testing and evaluation
- New adhesives and bonding systems
- The utilization of lesser-known wood species
- The modification of raw materials to improve their quality and behavior
- Economic feasibility, environmental issues and recycling

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
