

Special Issue

Urban Forest Landscape Planning, Management and Evaluation

Message from the Guest Editors

This Special Issue aims to publish high-profile papers that deal with up-to-date research in planning and managing urban forests. The scope of this issue is broad and encompasses research related to diverse biology and forestry disciplines such as botany, dendrology, entomology, forest pathology, etc., in the context of urban forests and their proper management and planning. In addition to this, there are newly developed IT tools (including decision support systems) and specialized software in forestry science that move both theory and practical work forwards, and papers dealing with this subject are also very welcome. The papers we are soliciting should help in understanding the process of urban forest planning, management, and evaluation by offering representative real case study examples or introducing contemporary methodology and practices.

Guest Editors

Dr. Milena D. Lakicevic

Dr. Kazuhiro Aruga

Prof. Dr. Won-Sop Shin

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
