Forest and Urban Green Space Ecosystem Services and Management

Message from the Guest Editors

Forests and urban green spaces are essential components of the global ecosystem, providing critical services that sustain both natural environments and human populations. This SI aims to compile cutting-edge research focused on the ecological aspects of forest and urban green space ecosystems. We welcome submissions that cover the following topics:

- Assessment of Ecosystem Services: Quantitative and qualitative evaluation of ecosystem services provided by forests and urban green spaces; tools and methods for assessing these services.
- Interaction between Ecosystem and Climate Change/Land Use and Cover Change.
- Biodiversity and Conservation.
- Technological Innovations: RS and GIS applications for monitoring and managing forest and urban green space ecosystems; Ecological modeling and big data analytics for ecosystem service assessment.
- Sustainable Management Practices for forests and urban spaces sustainable management.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
