Pathogenic Fungi in Forest

Message from the Guest Editors

Fungi form parasitic, saprophytic, and symbiotic relationships with plants and play significant roles in forest ecosystems. Pathogenic fungi are the main causal agents of plant diseases in forests, regulating the populations of woody and herbaceous plants. This regulation can result in quantitative and qualitative biomass losses, leading to economic losses or changes in forest stands. Newly emerged plant diseases in forests tend to present more complex pathosystems, including diverse cryptic species of fungal pathogens, mainly ascomycetes, basidiomycetes, and oomycetes, which threaten forest health. Therefore, it is critical to understand interactions between pathogenic fungi and woody and herbaceous plants in forests to minimize the impacts of fungal diseases and protect forest ecosystems. This Special Issue aims to contribute to advances in biology, ecology, etiology, epidemiology, population genetics of pathogenic fungi, and management of fungal diseases. Experimental studies, first reports, and review papers are all welcome.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
