Special Issue

Forest Landscape Conservation Planning

Message from the Guest Editor

Forests have contributed to human wellbeing and to national economies by providing multiple ecosystem services. Landscape ecology, a more holistic trend in the study of these landscapes, has facilitated their study, analysis, and understanding, which will in turn improve their conservation. It is important to remember that the historical study of this cultural heritage often allows us to understand the reason for the existence of current biodiversity, how it has evolved over the years, and what the future may hold, as well as traditional ecological knowledge (TEK) practices and systems to ensure the sustainable utilization and conservation of ecosystem services. This involves both public and private lands using both traditional and innovative approaches to plan a sustainable forest management and improve forest management practices (i.e., diversity of forest tree species and forest structure, thinning, grazing, etc.), including new bioeconomy value chains for maximizing wood and non-wood forest products and services while improving biodiversity and resilience.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa
Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:
JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
