Restoring Forest Landscapes: Impact on Soil Properties and Functions

Message from the Guest Editor

Restoring ecosystems is among the main goals we have to tackle in the coming decades. This could become the ecological restoration century, once we are already undergoing the multiple facets of the global change.

New restoration programs will require a greater balance between environmental, economic, and social objectives. New approaches towards more resilient forests will be based not only on new ecotechnologies and the multidisciplinary work but also on a deep ecological knowledge. We are looking for works on forest restoration and management that pursue to restore plant dynamics and plant–soil interactions beyond recovery a plant cover, as a first step towards a sustainable recovery of ecosystem functions. Any contributions related to promoting the ecosystem properties and functions provided by the plant–soil interface of forest landscapes in drylands and desertification-prone areas are also appreciated.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
