Climate Change Impacts on the Ecosystem Functions and Services of Mangrove Forests

Message from the Guest Editors

Mangroves are both economically and ecologically important, covering 70% of the tropical and subtropical sheltered coastlines. They provide many critical ecological functions and ecosystem services. However, mangroves have been extensively eliminated by human-induced habitat destruction and deforestation, inland hydrological alteration, and pollution in recent decades. If such exploitation of mangroves is uncontrolled, it will result in rapid decrease in abundance and diversity of mangroves and subsequently leading to permanent loss in biodiversity and many ecosystem services. Clearly, there is a pressing need for effective conservation, restoration and management of mangrove ecosystems for the battle against climate change and the sustainable future of nature and humans. We encourage studies from all fields, including experimental studies, monitoring approaches and models, to contribute to this Special Issue in order to promote knowledge and adaptation strategies for the preservation, management, and future development of mangrove forest ecosystems.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
