

## Special Issue

# (Towards) Sustainable Mangrove Socioecological Systems

### Message from the Guest Editors

Mangroves are increasingly recognized for the important roles they play globally as a carbon store, nationally protecting shorelines, and locally as source of natural resources for coastal communities. The services they provide mean they are important socioecological systems, where mangrove extent and health are influenced by social processes (knowledge, policy and institutions) operating across governance levels, and where mangrove changes can have profound effects on livelihoods. Despite the multiple benefits that mangrove ecosystems provide, they are under increasing pressure from a changing climate, resource overuse, clearance and coastal development. There is a pressing need to understand the dynamics of human–nature interactions and feedbacks in mangrove socioecological systems, their resilience in the face of social and biophysical change and how this knowledge might be applied to identify sustainable futures. We encourage studies from all fields to contribute to this Special Issue, but particularly from those using interdisciplinary approaches, in order to promote knowledge and strategies for a sustainable future for mangrove socioecological systems across the globe.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
