

## Special Issue

# Climate Change Effect on Mixed-Species Forest Management

### Message from the Guest Editor

In the face of environmental changes, mixed-species forests are considered as one of the most important measures of climate-adopted forest management in many places of the World. According to many studies, a mixed-species forest seems to be more resistant and more resilient to climate-induced changes. Furthermore, their role in providing many non-timber goods and services such as regulating, cultural and supporting services is recognized as an important factor contributing to human wellbeing. This Special Issue of forests will comprise selected papers dealing with advanced researches on mutual relationships between tree species in a stand and functioning of mixed-species forests being on different stages of development and along with ecological gradient under conditions of climate change. **Keywords**

- climate-smart forestry
- adaptive silviculture
- regeneration methods
- natural and artificial regeneration
- intermediate treatments
- silvicultural prescription
- mixed forests performance
- conversion methods
- mixed-species forest growth models
- inter-specific relationship

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
