# Modelling and Managing the Dynamics of Forest and Agroforest Ecosystems Biomass and Carbon Pools

### Message from the Guest Editor

This Special Issue aims at presenting new or improved versions of resources that allow better modeling and understanding the dynamics of forest and agroforest ecosystems biomass and carbon pools, while discussing implications on forest and agroforestry areas management. Considering the geographical scope of the Special Issue, papers focusing on different spatial levels will be accepted, ranging from the plot to the regional scales. Balance among countries and regions will also be considered as one of the objectives of this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
