

Special Issue

Trends and Challenges for Management in Wood Based Sector in the Digital Age—2nd Edition

Message from the Guest Editors

The business environment has changed considerably in recent years, driven primarily by digitalization and growing concern regarding the environment and natural resources. Companies (and societies) are integrating digital technologies into every aspect of business activities to increase competitiveness and efficiency and promote innovation. This includes transforming business models, strategic thinking, and customer relationships, thus enabling companies to reshape the way they work, communicate, and create value.

However, these changes also bring with them numerous management challenges. In addition, the requirements for sustainability and the implementation of circular economy concepts in business extend far beyond the boundaries of individual business units. Therefore, these changes must occur throughout the entire value chain, including the forest–wood value chain. This Special Issue invites articles addressing the changes in the management of the wood industry, focusing on digitalization and sustainability, and offering innovative solutions to these challenges. Original papers, reviews, and short communications are all welcome.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
