

Special Issue

Approaches to Forecasting Damage by Invasive Forest Pathogens

Message from the Guest Editors

The Special Issue "Approaches to Forecasting Damage by Invasive Forest Pathogens" aims to bring together cutting-edge research on predictive modeling, risk assessment, surveillance techniques, and management strategies for invasive forest pathogens. The scope includes, but is not limited to, the development of early warning systems, spatial modeling approaches, remote sensing applications, and decision-support tools. The Special Issue will feature original research articles, reviews, case studies, and methodologies that showcase the latest advancements in predicting the spread and impact of invasive forest pathogens. Topics may include novel modeling techniques, data integration methods, emerging technologies, and interdisciplinary approaches. We are soliciting contributions that address key challenges in forecasting damage by invasive forest pathogens. Submissions may focus on predictive modeling, risk assessment frameworks, surveillance methods, management strategies, case studies of successful forecasting efforts, or innovative tools for decision-making in invasive species management.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
