Protection, Ecological Restoration and Sustainable Management of Natural Forest: Theory and Technology

Message from the Guest Editors

The research on natural forest protection, ecological restoration, and sustainable management is of great significance to the global natural forest resources. This Special Issue aims to provide a useful reference for the protection, restoration and sustainable management of natural forests. Potential topics include, but are not limited to:

- Structure and function;
- Natural forest succession dynamics
- Diversity of natural forests (including plants, animals, microorganisms, structures, etc.);
- Growth pattern;
- Carbon fixation and carbon cycle;
- Hydrological ecology;
- Ecological restoration technology and effect evaluation;
- Protection and sustainable management technology, etc.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
