Arthropod Biodiversity and Ecology in Forest and Agricultural Ecosystems

Message from the Guest Editors

The Special Issue welcomes submissions that address the above-mentioned research questions and themes. Potential topics include, but are not limited to:

- Studies on arthropod diversity patterns and drivers in forest and agricultural ecosystems.
- Investigations into the ecological and evolutionary mechanisms underlying arthropod responses to habitat changes.
- Research on the role of arthropods in ecosystem processes, such as pollination, pest control, and nutrient cycling.
- Analyses of the impacts of global change factors (e.g., climate warming, nitrogen deposition) on arthropod communities and ecosystem functioning.
- Case studies showcasing successful conservation and management practices for arthropod biodiversity in forest and agricultural ecosystems.
- Reviews and meta-analyses summarize the current knowledge state and identify knowledge gaps in the field.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
