Recent Advances in Nondestructive Evaluation of Wood: In-Forest Wood Quality Assessments

Message from the Guest Editor

Recent research and development on nondestructive testing technologies has brought the in-forest assessment of wood and fiber properties of standing trees into forest management, resource evaluation, harvesting operation, and efficient wood utilization. Significant values are associated with the wood and fiber quality of our forests for the production of structural lumber, engineered wood products (such as glulam, LVL, and CLT), and pulping and paper. Rapid and nondestructive measurements on trees allow this value to be captured through better silvicultural practices, as well as the allocation of resources to highest value users and application of best processing methods. This Special Issue invites papers on in-forest wood quality assessment using emerging nondestructive technologies (SilviSvan, near infrared, resistance drilling, acoustics, and 3D laser scanning).

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
