Special Issue

Distribution, Species Richness, and Diversity of Wildlife in Forests

Message from the Guest Editors

This Special Issue is seeking contributions on spatial ecology, distribution patterns, biogeography, niche modeling, climate change impacts, and perspectives related to the wildlife in forests worldwide. We expect articles from research teams around the world, showcasing results from fieldwork and laboratory analyses, alongside deep discussions on biogeography and biodiversity in forest biomes in all continents. Potential topics include but are not limited to the following:

- Biodiversity;
- Biogeographic patters;
- Species distribution;
- Ecological modeling;
- Forest dynamics;
- Future perspectives for forests' conservation worldwide;
- Climate change effects:
- Defaunation and refaunation in forest biomes.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have Forests be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.
