

## Special Issue

# Dendrochronology in Archaeology: Current Research

### Message from the Guest Editor

This Special Issue is dedicated to dendrochronology and its classical application—archaeology and the study of humans' past. This branch of dendrochronology is called dendroarchaeology. We would like to present dendrochronology not only as a dating method but first of all as an interdisciplinary and well-established science applied to the reconstruction of our history and prehistory. In this Special Issue, we would like to invite you to present the current state of dendroarchaeology, including new discoveries, dating results, and innovative approaches transferable to dendroarchaeology: new statistical procedures, isotope study, DNA, the utilization of wood species considered not suitable for dendrochronology, etc. Our intention is to encourage you to participate in the exploration of past civilizations, human history, and prehistory within the climatic–environmental context, rooted in wood structures. We hope to induce close interdisciplinary cooperation with historians, archaeologists, and climatologists at the interface of humanities and natural sciences.

### Guest Editor

Prof. Dr. Tomasz Wazny

Institute for the Study, Conservation and Restoration of Cultural Heritage, Nicolaus Copernicus University, 87-100 Toruń, Poland

### Deadline for manuscript submissions

closed (31 December 2024)

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
