

## Special Issue

# Climate Change Impacts on Forest Dynamics: Use of Modern Technology

### Message from the Guest Editors

Innovative technology and clever green applications in forestry are required to mitigate the growing effects of climate change and environmental degradation. The integration of advanced monitoring systems, artificial intelligence, and data analytics could optimize forest management techniques to promote sustainability and enhance the well-being of communities. Real-time forest monitoring, precision forestry, and sustainable resource extraction are made possible through smart green applications, which minimize environmental harm while optimizing financial gains. Adaptive management strategies that reduce deforestation, improve carbon sequestration, and protect important habitats become easier via these technologies. The main goal of this Special Issue is to present state-of-the-art research (and case studies) on sustainable forestry methods that successfully achieve a balance between ecological preservation and technical innovation. In order to guarantee that forests continue to be a vital component of environmental sustainability and societal well-being, the findings of the studies contributed here will help design future policies and actions.

### Guest Editors

Prof. Dr. Zacharoula S. Andreopoulou

Laboratory of Forest Informatics, Faculty of Forestry and Natural Environment, Aristotle University of Thessaloniki, P.O. Box 247, 54124 Thessaloniki, Greece

Dr. Vasiliki Kamperidou

Department of Harvesting and Technology of Forest Products, School of Forestry and Natural Environment, Aristotle University of Thessaloniki, Thessaloniki, Greece

### Deadline for manuscript submissions

25 February 2026

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
