# Biomass and Bioenergy from Forests: Challenges and Prospects for the Future

### Message from the Guest Editors

Biomass from forests and dedicated forest plantations represents a renewable source used in the production of thermal and electrical energy, as well as to produce timber for industrial use. From the point of view of energy production, it represents a valid alternative source to fossil fuels capable of producing energy in a more sustainable way and with a lower environmental impact. The biomass supply chain for energy is certainly more complex than the fossil fuel supply chains. The considerable variability of the raw material procurement conditions, linked both to the level of mechanization used in the various stages of the production process, and to the quality and quantity of product available, to market conditions and to price fluctuations, strongly affects the energy producible from forest biomass and the stability of its price. For this reason, all those production systems and models capable of optimizing the various production processes of the energy chain must be encouraged, providing solutions on the design, management and final transformation of biomass.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
