## Forest Microclimate: Predictions, Drivers and Impacts

### Message from the Guest Editors

Forest vegetation creates a special forest climate or microclimate. The microclimate is influenced by the macroclimate of the wider area, the type of forest habitat, topography, forest trees species, and the age and structure of the forest stand. Various physiological and ecological processes of vegetation growth, soil microbiology, biodiversity, and fauna are related to the microclimatic conditions. The silviculture treatments and the degradation of forest stands can also change the microclimate conditions. Urban forests can provide citizens with favourable conditions for rest and recreation. To study all the biological and ecological processes in forests, the data of forest climate or microclimate is important. Potential topics include, but are not limited to:

Forest–microclimate interactions; Forest microclimate and natural regeneration; Silviculture treatments and forest climate; Large-scale forest disturbances and microclimate; Forest microclimate and soil microbiology; Forest phenology; Forest degradation; Canopy gaps; Climate change and forest climate change; Urban forests and park forests; Forest microclimate and wildlife.

### Guest Editors

Dr. Damir Ugarković

Faculty of Forestry and Wood Technology, University of Zagreb, 10000 Zagreb, Croatia

Dr. Urša Vilhar

Department of Forest Ecology, Slovenian Forestry Institute, Večna Pot 2, 1000 Ljubljana, Slovenia

### Deadline for manuscript submissions

closed (31 March 2025)

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
