Pest Outbreak Management in Forests under Ambient Change

Message from the Guest Editors

In recent years, insect outbreaks have changed profoundly; this is due to ambient changes mostly attributed to climate, which influence physiological modifications in tree defences or the abundance of pests and their natural enemies and competitors. It is not only climate change that can explain unusual events like unexpected outbreaks of previously benign pests. Unusual behaviour of natural enemies or multilevel interactions between different organisms associated with forest pests have been reported as well. It is of great importance to learn from such events to better understand why these unexpected behaviours really occur and how they can be applied in pest management. Exchange of scientific evidence is therefore urgently needed.

We encourage the contribution of studies from all fields, including experimental studies, monitoring approaches, and models, to this Special Issue in order to promote knowledge for future pest management and strategies aimed at stabilizing forest ecosystems.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
