

## Special Issue

# Ecology of Plant-Herbivore Interactions

### Message from the Guest Editor

In this Special Issue, we focused on herbivores, who have a major impact on forests and/or plants. Indeed, the interactions between plants and herbivores are among the most important ecological interactions in nature. As primary producers, almost all plants inevitably avoid being eaten by herbivores. These relationships have affected, among other things, the tolerance mechanisms that decrease the impact of herbivores' (ungulates, insects, galliformes, etc.) damages, and escape strategies that reduce the probability of plants to be found by herbivores, and resistance traits that reduce the amount of damage received, including physical, chemical, and biotic traits. In this Issue, research articles may focus on any aspect of interaction between plant and herbivores, including experimentation (exclosure–control). Studies dealing with the effects of herbivores on forest regeneration are also welcome. In this Issue, both theoretical and empirical papers on plant–herbivore interactions are welcome, but combinations are particularly sought.

## About the Journal

### Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

#### Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
