Patterns of Plant Species Diversity under Different Disturbance Regimes

Message from the Guest Editor

Plant species diversity influences forest functions and the ecosystems services they provide. Natural disturbances play an important role in the creation and maintenance of forest diversity. However, global change is expected to alter disturbance regimes, creating novel conditions for forest ecosystems and their diversity. Thus, a deeper understanding of how forest diversity relates to different disturbances across regions is required to anticipate the response of forest diversity to altered disturbance regimes. Particularly, there is an urgent need to understand how the diversity of canopy as well as understory taxonomic and functional species responds to altered disturbance regimes, how disturbances influence above- and below-ground diversity linkages, and whether forest resilience to disturbances depends on diversity.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
