Abiotic and Biotic Stress in Forest and Plantation Trees

Message from the Guest Editor

The incidence of abiotic and biotic stress in trees is increasing globally, leading to escalating concerns for forest protection, biodiversity, the provision of ecosystem services, biosecurity, economic production, and rural livelihoods. Tree declines are now present in most geographical regions in the world, extending from cold temperate to tropical forests. The objective of this Special Issue of *Forests* is to explore, using review articles and original research papers, the major abiotic and biotic stressors that have caused or incited significant tree decline and mortality in natural and planted forests over the past decade. It will also explore the recent drivers of change, global threats, risk management, and related topics.

About the Journal

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access. Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Editor-in-Chief

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia,
I-25121 Brescia, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank:

JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
